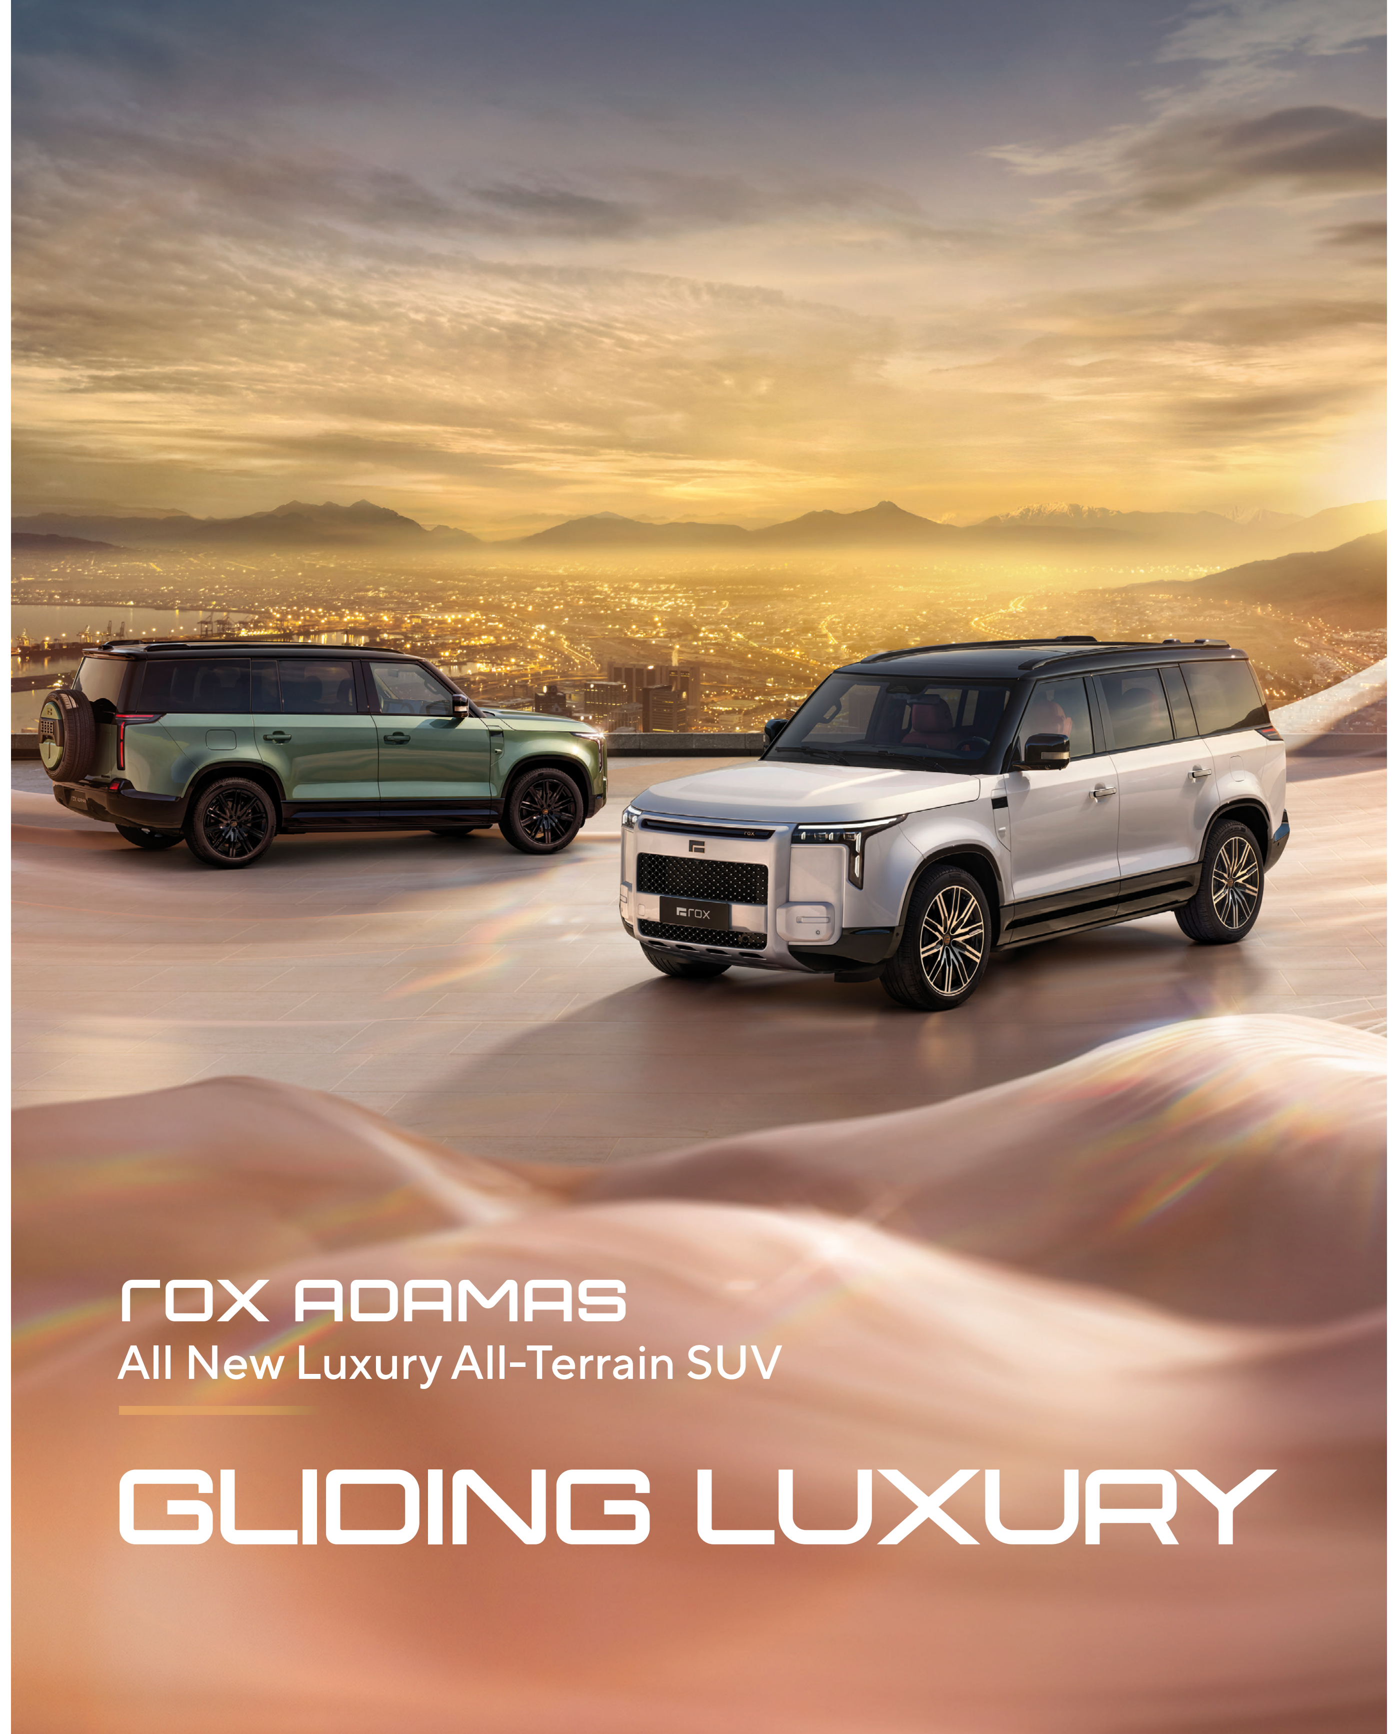
Gliding Intelligence

End-to-end intelligent architecture.
Leading intelligent driving assistance and smart cockpit.

Gliding Outdoor Experience

Designed for every outdoor culture and lifestyle across the globe.
A premium, customized solution for all your adventures.

This brochure was printed in October 2025. All images, in-vehicle screens, features, and vehicle specifications shown are for reference only. Please refer to vehicles available in your local market for final details.



rox ADAMAS

All New Luxury All-Terrain SUV

GLIDING LUXURY

Gliding Sensations

Refined inside and out, exuding confident luxury.
Comfort that exceeds first-class standards.

Gliding Driving

Ultra-luxury-level chassis materials and architecture.
Engineered for exceptional off-road capability in global conditions.

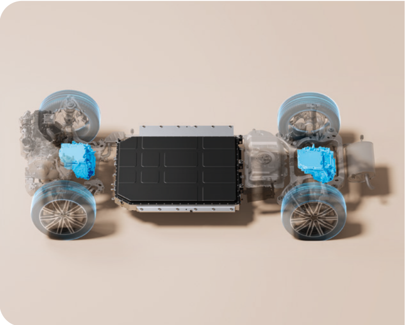
Gliding Sensations

7-Seater(2-3-2): Versatile and Spacious Cabin

8.5 L Dual-mode Cooler/Warmer

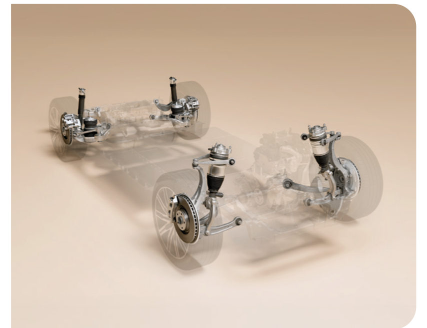
6-Seater(2-2-2): First-class Zero-gravity Seats

Gliding Driving



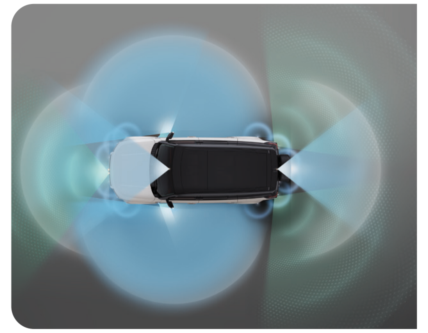
- Full-time AWD
- 0-100 km/h in 5.5 s
- Combined Range WLTC 1226 km

- 140 mm Ride-height Adjustment Air Suspension
- Dynamic Damping Control



- All-aluminum Independent Suspension
- Front Double-wishbone and Rear H-arm Multi-link Suspension

Gliding Intelligence



26-Sensor, 128-TOPS Intelligent Driving Assistance System

Wireless Connectivity with OTA Upgrades

(Supported in Egypt, Jordan, Kuwait, Oman, Saudi Arabia, Qatar, UAE)

Extensive Entertainment and Media Apps

Gliding Outdoor Experience

Up to 5.7 kW External Power Output (3.5 kW V2L + 2.2 kW 220V) for Up to 8 Hours

2nd & 3rd Rows Fold Flat into Bed Space (7-Seater)

World's First Tailgate Kitchen System

Tips:

1. The Combined range and EV range (full SOC) data under WLTC are obtained by ROX and its partners in accordance with the relevant corporate test standards and verified by a nationally certified third-party laboratory. The actual range of the vehicle may vary due to objective factors such as ambient temperature, road conditions, driving habits, operating behavior, and battery service life during real-world driving. ROX reserves the right to adjust the content of the parameter configuration table within the legal range, and the specific parameter configuration will be subject to the final delivered vehicle.
2. 7-level height adjustment settings: Recovery mode, Highest, High, Standard, Low, Basement parking garage mode/Access assist, and Easy trunk loading mode.
3. The maximum wading depth is 770 mm in Recovery mode. Please avoid dynamic driving or prolonged immersion at this depth. The vehicle cockpit is defined as a dry area. Please avoid water entering the cockpit during wading.
4. The Nappa leather coverage area includes the perforated areas of the seat cushion and seat back.
5. The on-board data network and mobile APP remote vehicle control functions are currently supported in the UAE, Saudi Arabia, Qatar, Kuwait, Oman, Jordan, and Egypt, and will be available in other countries and regions later.
6. The LCC and wading-detection system will be implemented via OTA or through an after-sales upgrade in the first quarter of 2026.
7. The driver assistance system is only an auxiliary function and cannot handle all traffic, weather, or road conditions. The driver must always monitor and maintain active control of the vehicle. Please use it with caution in complex weather or road conditions.
